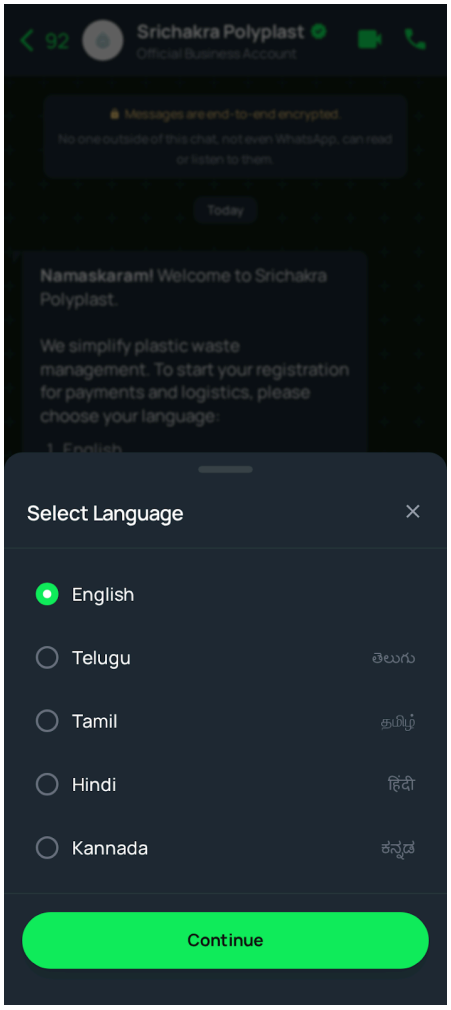
Srichakra Supplier WhatsApp Experience - Visual Guide

1. Onboarding & Registration

Language Selection

The first interaction a supplier has is selecting their preferred language. This ensures all subsequent communication is clearly understood.



2. Main Dashboard

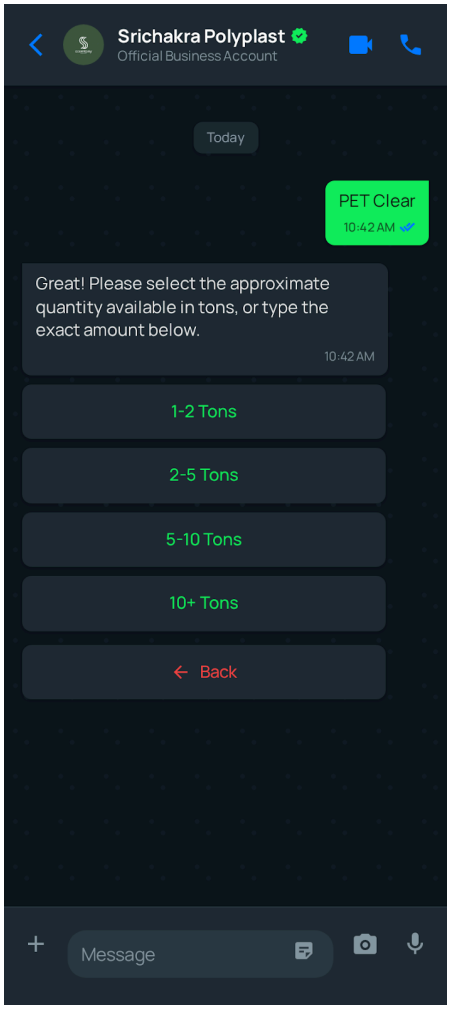
Main Menu (Telugu)

After onboarding, the supplier sees the main menu options tailored to their language preference (shown here in Telugu). This is the central hub for all actions.

3. Material Dispatch Transaction

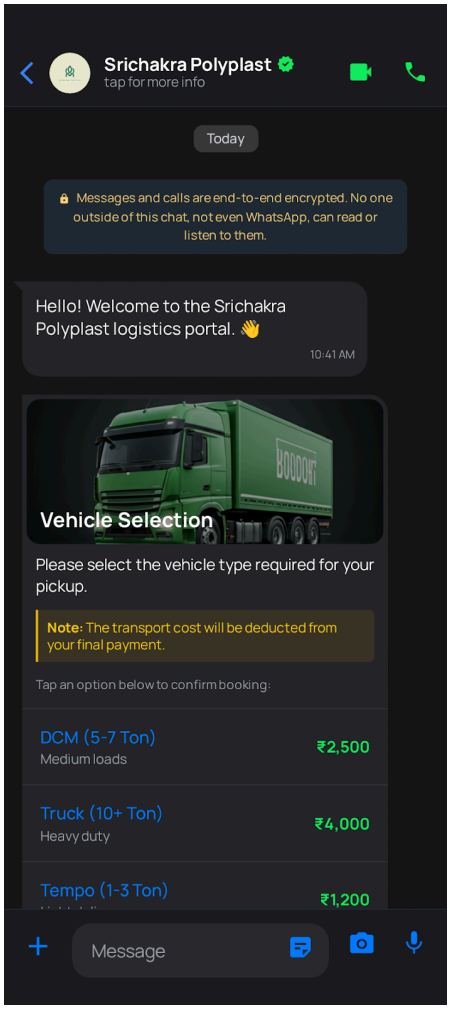
Material & Quantity Selection

Suppliers initiate a transaction by specifying the type of material (e.g., PET Clear) and the estimated quantity (in tons).



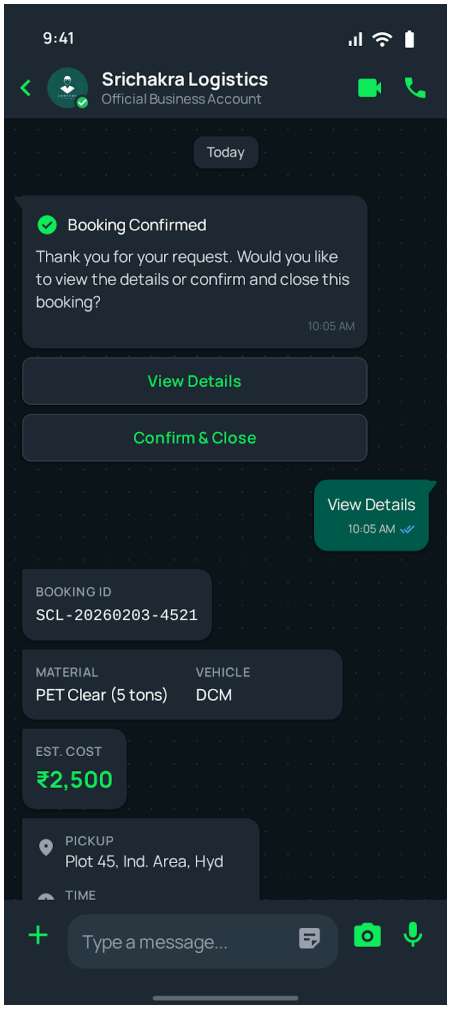
Vehicle Selection

Suppliers can choose to book Srichakra logistics or use their own transport. If booking logistics, they select the appropriate vehicle type based on the load.



Booking Confirmation

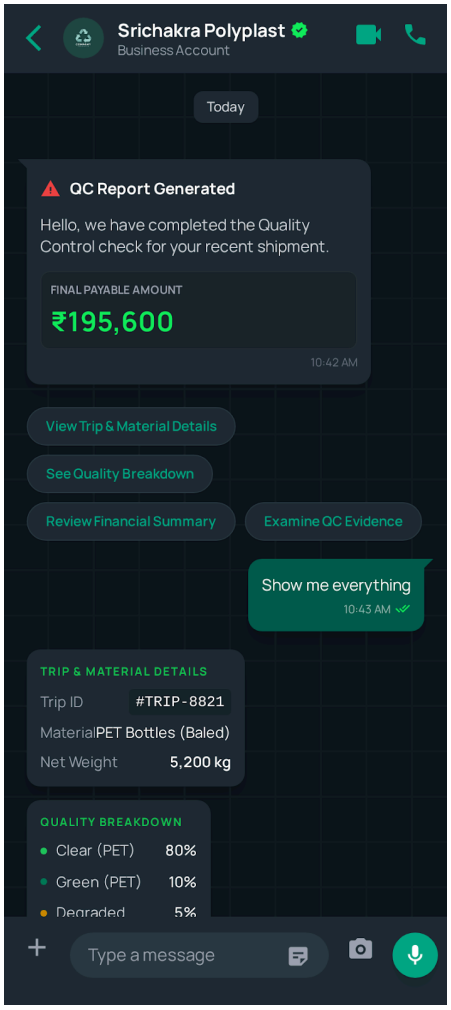
Once the details are entered, a confirmation message summarizes the booking ID, material, vehicle, and pickup details.



4. Quality Check & Financials

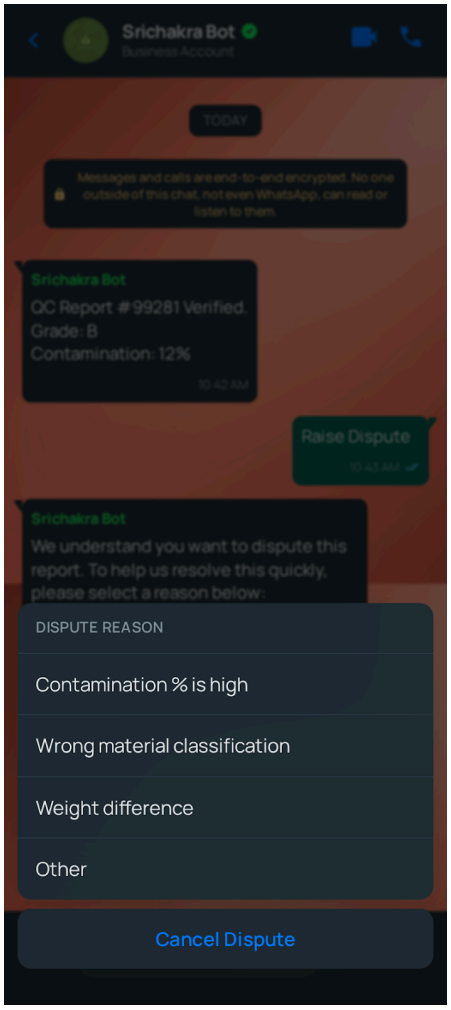
QC Report & Debit Note

After material delivery, the supplier receives a QC report. If contamination is found, a detailed breakdown and resulting debit note are presented immediately.



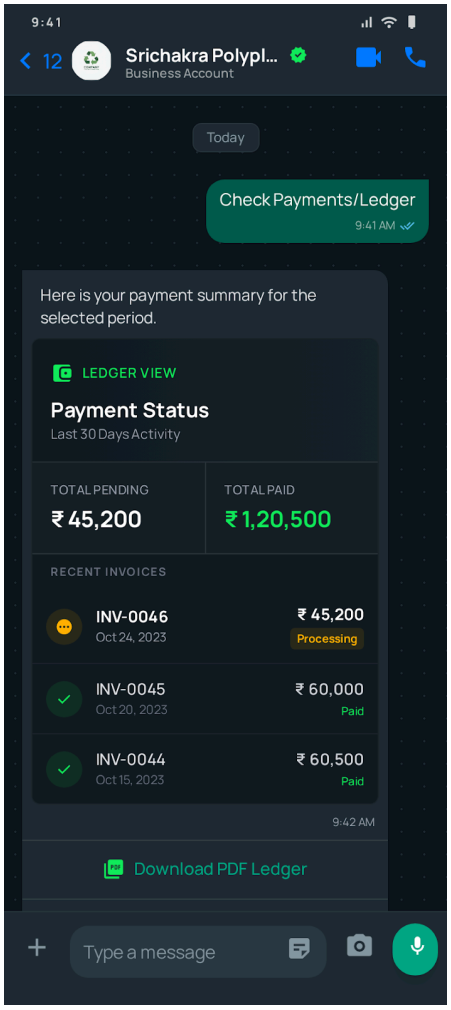
Raise Dispute

If a supplier disagrees with the QC report or debit note, they can easily raise a dispute directly from the WhatsApp interface by selecting a reason.



Payment Ledger

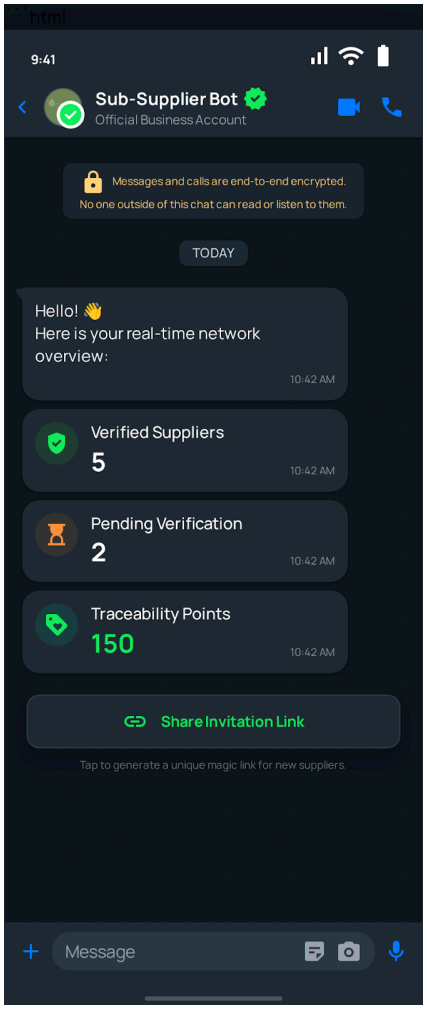
Suppliers can view their financial status, including paid invoices and pending payments, providing transparency and trust.



5. Ecosystem & Rewards

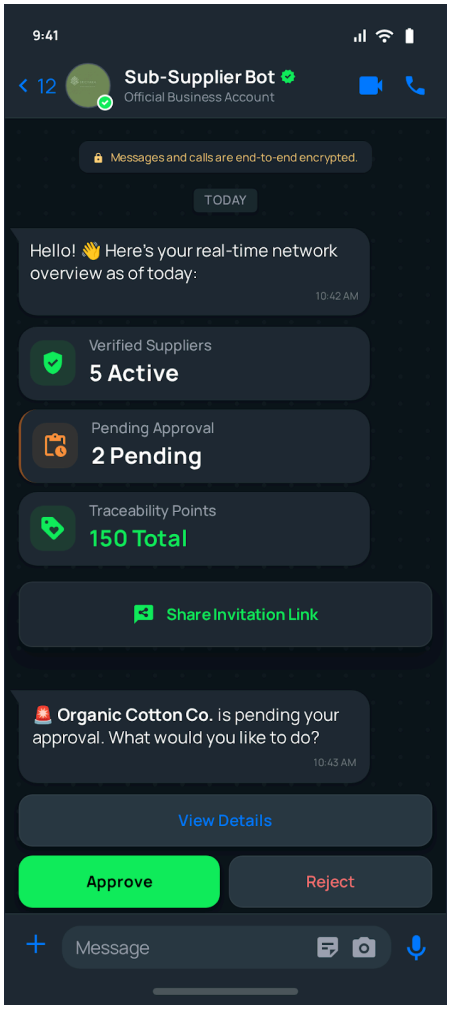
Sub-Supplier Network Overview

Suppliers can manage their own network of sub-suppliers (Tier 2), adding traceability to the supply chain.



Adding Sub-Suppliers

Interfaces for adding or inviting new sub-suppliers to the network.



Rewards Dashboard

A gamified dashboard showing loyalty points earned through shipments, sub-supplier verification, and training, encouraging better performance.
